

ReNu Medical appoints Don Selvey as the newest member of the Board of Directors.

Key addition to ReNu's board further strengthens the company's impeccable quality commitment and FDA compliance record.

Everett, WA. (Business Wire) June 18, 2008, [ReNu Medical, Inc.](#) (ReNu) announced today that Don Selvey has joined the company's Board of Directors. Mr. Selvey, an international-renowned expert in sterile medical device reprocessing, adds his extensive experience in Medical Device Regulatory Affairs, Quality Assurance and Clinical Research to the ReNu Medical Board of Directors.

"We are thrilled to have the industry representative who was instrumental during the development of the Medical Device User Fee and Modernization Act join our board. Mr. Selvey is like-minded with ReNu in all aspects from business ethics and regulatory concepts to the highest quality standards," said Randy Long, CEO. "With the addition of Don Selvey to our team, ReNu showcases our commitment to attracting and retaining extraordinarily qualified and forward thinking people assuring we continue to deliver the high quality products for our customers and their patients."

"As part of ReNu's board, I am fortunate to be able to apply my knowledge and experience creating, organizing and directing quality assurance, ISO standards, and regulatory affairs in the reprocessing and medical device industry in support of joint goals for ReNu Medical, its' current and future customers, and the reprocessing industry," Mr. Selvey stated. "Since inception as a reprocessor of non-sterile medical devices, ReNu has provided the highest quality products to its customers, as well as superior customer service. I am excited to be part of ReNu Medical's impressive expansion plans and continued growth."

Mr. Selvey is the former Senior Vice President of Regulatory Affairs and Quality Assurance at Ascent Healthcare Solutions where he designed and implemented quality systems and became one of the first in the U.S. to be certified under the newly revised international standard, ISO 13485:2003. Throughout his career, Mr. Selvey has regularly spoken as an industry expert at industry conferences, testified in front of the US Congress and state legislatures, has been frequently quoted in trade press, and has held adjunct faculty positions in Public Health at Arizona State University and in Microbiology at Coconino College.

Mr. Selvey's professional depth is built upon experiences developed while a public health sanitarian, a noted infectious disease epidemiologist, and head of quality and regulatory affairs at both W.L. Gore and Associates, a manufacturer of biomaterials such as vascular grafts and at MiniMed, Inc. a manufacturer of insulin pumps, infusion sets, and blood glucose monitoring equipment. More recently, Mr. Selvey has been providing consulting services to medical device entrepreneurs.

"Don's experience is vast, which is only one reason he is such a great addition to our board," noted Bruce Pierson, COO. "He shares ReNu's environmental values and commitment to providing healthcare facilities the confidence to safely re-use appropriate medical devices, while significantly reducing supply chain costs and medical waste."

About ReNu Medical:
